PROFESSIONAL SUMMARY

Final-year CSE student (9.6 GPA) at KL University with production-grade Full Stack experience across MERN and Java/Spring Boot stacks. Shipped a live Agri-tech platform for JPMorgan Chase's Code for Good 2025, and independently delivered two full-stack systems consumed by real NGO and cybersecurity users. Holds Red Hat, CEH, and Juniper certifications — rare credentials for a fresher.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, C

Frontend: React.js, HTML5, CSS3, EJS

Backend: Node.js, Express.js, Spring Boot, Django

Databases: MongoDB, MySQL

Auth & Integrations: Google OAuth, OTP / SMS (Twilio), Payment Gateway

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse

Certifications: Red Hat Certified Enterprise App Developer · Certified Ethical Hacker (CEH) · Juniper JNCIA-Junos

WORK EXPERIENCE

Full Stack Developer | JPMorgan Chase & Co. — Code for Good 2025 *Jun 2025*

- ▶ Sole MERN-stack developer on a 24-hour hackathon team that delivered a production-ready Agri-tech platform — selected out of hundreds of applicant teams nationally.
- ▶ Architected role-based access control (farmer / admin / donor) with Google OAuth + OTP login, securing multi-user workflows for a live NGO environment.
- ▶ Integrated real-time SMS alerts and a chatbot, enabling zero-latency crop status updates and donor communication across 3 distinct user roles.
- ▶ Shipped payment gateway and data visualization dashboards, turning raw crop data into actionable insights for NGO administrators.

Web Developer | Solid NGO — Kash College *Jul 2025 – Oct 2025*

- ▶ Building a MERN + EJS platform to fully digitize operations of a college and NGO, replacing manual paper-based workflows for 500+ stakeholders.
- ▶ Designed and shipped 8+ interactive React data-visualization components, cutting admin reporting time by eliminating manual spreadsheet compilation.
- ▶ Owns end-to-end frontend architecture — component design, state management, and UX — on a production deployment serving live users.

PROJECTS

CML's Barn Live — Agri-tech Platform · MongoDB · Express.js · Node.js · React *Jun 2025*

- ▶ Built end-to-end from scratch: role-based access, OTP login, real-time chat, chatbot, and payment integration — 6 features shipped in a single hackathon sprint.
- ▶ Enabled farmer onboarding and crop tracking workflows, removing the need for NGO staff to manually log and relay field data.
- ▶ Integrated SMS alerts to trigger automatic notifications at key crop lifecycle events, improving response time for field interventions.

Zakishi — Cybersecurity Job Portal · Java · Spring Boot · MongoDB · ReactJS *Jul – Dec 2024*

- ▶ Designed and implemented a RESTful API with Spring Boot that supports full job-lifecycle management: post, search, apply, and track — all secured endpoints.

- Connected a React.js frontend to a MongoDB backend, delivering a responsive single-page experience for both job seekers and employers.
- Gained hands-on exposure to application-layer security practices aligned with CEH certification knowledge — rare for a fresher portfolio project.

EDUCATION

B.Tech in Computer Science & Engineering | KL University **GPA: 9.6 / 10** 2022 – 2026

Intermediate (MPC) | New Vision Junior College **GPA: 9.6 / 10** 2022

CBSE 10th | V V Central Public School **GPA: 8.6 / 10** 2020
